WORK EXPERIENCE

APPLICATION DEVELOPER | Internship

Feb 2026 - Present

EtherX innovations Pvt Ltd

Hybrid • Bangalore, Karnataka

- **Developed** React Native applications with **authentication** and **authorization** functionality.
 - **Engineered** backend features using Node.js and Express.js, alongside **database management** tools.
 - **Implemented** AI/ML techniques for model training, enhancing application performance through **testing** and **debugging**.
- Technologies / Skills Used :** React Native, React, Express, Node.js, Python, AIML

PROJECTS

CertAuth

Apr 2026 - May 2026

Full-Stack Developer

Developed a secure, full-stack monorepo ecosystem combining a **React Native** mobile application with an **Express/Node.js** backend and **Supabase** cloud infrastructure to securely capture, encrypt, and sync digital assets.

Key Accomplishments:

- **Security & Privacy:** Implemented end-to-end **AES-256-GCM** encryption, **TOTP 2FA**, and a **ScreenGuard** module to prevent unauthorized system screenshots and recordings.
- **Media Integration:** Integrated **VisionCamera** protocols for rapid, high-velocity QR code scanning and verification.
- **DevOps & Optimization:** Deployed the **Node.js** backend on **Render** using **Prisma ORM** with **UptimeRobot** monitoring, and packaged an optimized **17MB stable Android APK** via GitHub.

Technologies / Tools Used : React Native, Express, Node.js, Prisma ORM, Supabase

AI-Powered Fraud Detection using Synthetic Data

Mar 2026 - Apr 2026

AI/ML Developer

- **Generated** synthetic credit card transaction data using **CTGAN** to tackle fraud data scarcity and enhance privacy.
- **Built** and evaluated fraud detection models trained on **real, synthetic, and hybrid datasets** using Random Forest.
- **Assessed** model performance with **Precision, Recall, F1-Score, Confusion Matrix, and ROC-AUC**.
- **Developed** a **Streamlit-based web application** for real-time fraud prediction and batch transaction analysis.

Technologies / Tools Used : Python, Streamlit, CTGAN, Random Forest

SKILLS

Databases :	MySQL, SQLite, Supabase
Frameworks & Libraries :	Django, React, Flask, Express.js, React.js
Programming Languages :	Python, Java, C, SQL, JavaScript, React Native
Tools & Platforms :	Git, Docker, GitHub, MongoDB, MySQL, GCP

EDUCATIONS

Cambridge Institute of Technology | Bangalore, Karnataka

2023 - 2027

B.E in Artificial Intelligence & Machine Learning

CGPA : 9.1

TRAINING & CERTIFICATIONS

- Completed **AWS Training** with Face Prep
- Finished the **TCS Young Professional Course** on "Communication & Workplace Skills" via TCS ION
- Acquired fundamentals of **AI & ML** through the foundational Data Science course on Infosys Springboard
- Completed a **Python Course** through NPTEL
- Participated in the **GenAI Exchange Program** with Google Cloud & Hack2Skill
- Completed internship training in **Application Development** and **AI & ML** at EtherX Innovations Pvt Ltd

EXTRA CURRICULAR ACTIVITIES

- **Coordinated** technical and cultural events at college, enhancing event logistics and execution.
- **Actively participated** in the National Service Scheme (NSS), engaging in various community outreach and social impact programs.
